Flashlight LED • 200lm • Q2

The hyper-focus technology and the aluminum reflector ensure a high light output. As the power Cree LEDs are mounted on heat sinks, both maximum power and high yield of thermal control is achieved. This results in low power consumption and a long lifespan.

This Q2 has the larger Hyperfocus system of the Q3, but the flashlight is smaller and lighter. Despite being powered by only 1x AA, it remains extremely powerful. The practical shift focus ensures a quick change of the beam angle with just one hand.

Specifications

Brand	Suprabeam
Type	Q2
Battery	1x AA
Colour	Dark grey
Length	116mm
Diameter	26mm
Light source	LED
Luminous flux	Max. 200lm
Controller	2 light levels
Lighting time	Max. 2h
Lighting range	150m
Focus	Variable from spot to floodlight with sliding focus
Operating temperature	-20°C to +50°C
Ingress protection	IPx4
Weight	80g
Switch	Push button at the bottom of the flashlight
Material	Anodized, high-strength aluminum
Contents of the box	Flashlight / pouch / strap / 1x AA battery / manual
