UNIQUE SELLING POINTS (USP)

SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round flood light beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

INTELLIGENT LIGHT CONTROL

The advanced electronic micro controller offers switching between high and low light power by simple switch operation. In addition, it controls the light output for optimized battery lifetime.

SWITCH

The endcap metal button is a switch with a task function, allowing you to step through the light modes without activating the lamp constantly. The different light functions are provided by our Intelligent Light Control circuit.
