SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round floodlight beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

DIMMING + MEMORY

The new electronic task switch combined with our new dimming control, offer simple and stepless power adjustment from 400 down to 8 lumens. It memorizes the last used light output and upon one single click it activates maximum power again.

3 BATTERIES VS. 4 BATTERIES

The Q4 is using 3xAAA alkaline batteries but has the same performance as most torches using 4xAAA alkaline batteries. In daily life this means that you and the environment save a battery each time you would have to change batteries, without compromising performance.
